Italian Society for Neurosurgery

JOURNAL OF NEUROSURGICAL SCIENCES

VOLUME 33 - 1989

Index

Subjects Index

Abdominal vessel injury
Injuries to the large abdominal vessels during lumbar nucleotomy, 281.

Achondroplasia
Narrowing of thoraco-lumbar spinal canal in achondroplasia, 185.

Acoustic tumors
Radiosurgery in intracranial tumors and vascular malformations, 91.

Acromegaly
Tension pneumocephalus after transsphenoidal surgery for acromegaly, 311.

Aneurysms
A case of thrombosed aneurym of the vein of Galen associated with superior sagittal sinus thrombosis, 305.

Arachidonic acid metabolism
Prostaglandins in human brain tumors, 65.

Arteriovenous malformations
Radiosurgery in intracranial tumors and vascular malformations, 91.

Arteritis
Stroke syndrome in the young due to obliterative arteritis of extracranial carotid arteries. Clinical pathological profiles, 333.

Arthrodesis
The operation of arthrodesis for malformations of the occipito-atloid joint, according to Gilles Bernard, 197.

Astrocytoma
Predictive accuracy of cell kinetics data in glial tumors investigated by serial stereotactic biopsy, 43.
Radiation-associated cerebral gliomas. A report of two cases and review of the literature, 271.

Beta endocavitary treatment
Long term results of stereotactic endocavitary beta irradiation of craniopahryngioma cysts, 99.

Bilateral arthrodesis
The operation of arthrodesis for malformations of the occipito-atloid joint, according to Gilles Bernard, 197.

Biopsy
Indications of stereotactic biopsy, 11.

Biopsy forceps
Methodology of stereotactic biopsy, 5.

Bleomycin
Preliminary results of intracavitary treatment of craniopharyngioma with bleomycin, 145.

Bone graft
Parailiac ectopic bone complicating the removal of a bone graft for cervical disc surgery, 207.

Brachycurietherapy
Possibilities and limits of brachycurietherapy in brain tumors, 115.

Brachytherapy
Stereotactic interstitial radiotherapy for brain tumors, 83.
Stereotactic irradiation therapy. Physical and dosimetric problems, 135.

Brain tumors
Cell kinetics studies of human intracranial tumors, 47.
Contributions of experimental tumors to the relationship between carcinogenesis and differentiation, 35.
Familial frontal lobe oligodendroglioma. Case report, 317.
Future perspectives in stereotactic neurosurgery: stereotactic microsurgical removal of deep brain tumors, 149.
Human glioma lines as experimental model for biologica and chemosensitivity studies, 39.
Indications of stereotactic biopsy, 11.
Intraventricular craniopharyngioma. Clinical and surgical considerations, 161.
Leiomyosarcoma metastatic to the brain with prolonged survival, 291.
Linear accelerator radiosurgery. A clinical experience, 123.
Methodology of stereotactic biopsy, 5.
Neuro-oncological problems in the histological diagnosis of stereotactic biopsies, 23.
Occasionally-occurring familial brain tumours (OFBT). Reports of cases and review of the literature, 263.
Possibilities and limits of brachycurietherapy in brain tumors, 115.
Prostaglandins in human brain tumors, 65.
Stereotactic interstitial radiotherapy for brain tumors, 83.
Stereotactic radioisotope implantations in the treatment of inoperable low malignancy neoplasms, 119.

BUDR
Cell kinetics studies of human intracranial tumors, 47.

Bypass graft
Stroke syndrome in the young due to obliterative arteritis of extracranial carotid arteries. Clinical pathological profiles, 333.

Carcinogenesis
Contributions of experimental tumors to the relationship between carcinogenesis and differentiation, 35.

Carotid obstructions
Stroke syndrome in the young due to obliterative arteritis of extracranial carotid arteries. Clinical pathological profiles, 333.

Cavernoma
Cavernous angioma of the Central Nervous System, 229.

Cavernous aneurysm
Late onset of a large cavernous aneurysm after spontaneous disappareance of cerebral arteriovenous malformation. Case report, 211.

Cavernous angioma
Cavernous angioma of the Central Nervous System, 229.

Cell kinetics
Cell kinetics studies of human intracranial tumors, 47.
Predictive accuracy of cell kinetics data in glial tumors investigated by serial stereotactic biopsy, 43.

Cerebral arteriovenous malformations
Late onset of a large cavernous aneurysm after spontaneous disappareance of cerebral arteriovenous malformation. Case report, 211.

Cerebral gumma
Paretic neurosyphilis and cerebral gumma. Case report, 319.

Cerebral haemorrhage
Spontaneous intracerebral haematomas: surgical versus conservative treatment based on Glasgow Coma Scale score and computer tomography data, 165.

Cerebral metastasis
Leiomyosarcoma metastatic to the brain with prolonged survival, 291.

Cerebral neoplasms
Stereotactic radioisotope implantations in the treatment of inoperable low malignancy neoplasms, 119.

Cerebrospinal fluid cytology
"Primary" leptomeningeal dissemination of medulloblastoma. Report of an unusual case, 219.

Cerebrovascular accidents in the young
Stroke syndrome in the young due to obliterative arteritis of extracranial carotid arteries. Clinical pathological profiles, 333.

Cervical disc surgery
Parailiac ectopic bone complicating the removal of a bone graft for cervical disc surgery, 207.

Chemosensitivity
Human glioma lines as experimental model for biologica and chemosensitivity studies, 39.

Chromosome map
Occasionally-occurring familial brain tumours (OFBT). Reports of cases and review of the literature, 263.

Colloidal radioisotopes
Colloidal radioisotopes as part of a multi-modality treatment of craniopharyngiomas, 95.
Stereotactic endocavitary treatment of cysts and pseudocysts of glioma. Preliminary report, 107.

Computed tomography
Enterogenous cyst of the spinal cord terminal cone. Clinical and radiological aspects (CT and MRI), 287.
Future perspectives in stereotactic neurosurgery: stereotactic microsurgical removal of deep brain tumors, 149.
Intraventricular craniopharyngioma. Clinical and surgical considerations, 161.
Narrowing of thoraco-lumbar spinal canal in achondroplasia, 185.
"Primary" leptomeningeal dissemination of medulloblastoma, Report of an unusuale case, 219.
Spontaneous intracerebral haematomas: surgical versus conservative treatment based on Glasgow Coma Scale score and computer tomography data, 165.
Sturge-Weber disease without facial nevus, 215.

Computer graphics
Computer assisted analysis of neuroradiological data in planning neurosurgical procedures, 19.

Computers
Future perspective in stereotactic neurosurgery: stereotactic microsurgical removal of deep brain tumors, 149.
Spontaneous intracerebral haematomas: surgical versus conservative treatment based on Glasgow Coma Scale score and computer tomography data, 165.

Computerized tomography
Paretic neurosyphilis and cerebral gumma. Case report, 319.

Craniopharyngioma
Colloidal radioisotopes as part of a multi-modality treatment of craniopharyngiomas, 95.
Intraventricular craniopharyngioma. Clinical and surgical considerations, 161.
Preliminary results of intracavitary treatment of craniopharyngioma with bleomycin, 145.

Cushing's disease
Radiosurgery in intracranial tumors and vascular malformations, 91.

Cystic craniopharyngiomas
Long term results of stereotactic endocavitary beta irradiation of craniopharyngioma cysts, 99.

Dosimetry
Dosimetric aspects in stereotactic radiotheraphy using small shielded sources, 141.
Panel discussion on physical and dosimetric aspects: conclusions, 143.
Stereotactic irradiation therapy. Physical and dosimetric problems, 135.

Dural sinuses
A case of thrombosed aneurysm of the vein of Galen associated with superior sagittal sinus thrombosis, 305.

Ectopic iliac bone
Parailiac ectopic bone complicating the removal of a bone graft for cervical disc surgery, 207.

Empty sella
A simple procedure for management of spontaneous cerebrospinal fluid rhinorrhea by injection of fibrin sealant. Technical note, 297.

Endocranial tumors
Some differences in steroid receptors between meningeal and neuroepithelial tumors, 71.

Enterogenous cyst
Enterogenous cyst of the spinal cord terminal cone. Clinical and radiological aspects (CT and MRI), 287.

Epilepsy
Sturge-Weber disease without facial nevus, 215.

Exophthalmos
Orbital decompression for severe Graves' ophthalmopathy. Results of a three-wall operative technique, 323.
Surgical treatment of Graves' ophthalmopathy by decompressive orbitotomy, 173.

Experimental brain tumors
Contributions of experimental tumors to the relationship between carcinogenesis and differentiation, 35.

External subarachnoid drain
Tension pneumocephalus after transsphenoidal surgery for acromegaly, 311.

Facial nevus
Sturge-Weber disease without facial nevus, 215.

Familial brain neoplasms
Familial frontal lobe oligodendroglioma. Case report, 317.

Fibrin sealant
A simple procedure for management of spontaneous cerebrospinal fluid rhinorrhea by injection of fibrin sealant. Technical note, 297.

Fifth nerve
Percutaneous selective thermorhizotomy in the treatment of "essential" trigeminal neuralgia. The importance of lesion selectivity, 179.

Flow-cytometry
Cell kinetic studies of human intracranial tumors, 47.

Glasgow Coma Scale
Spontaneous intracerebral haematomas: surgical versus conservative treatment based on Glasgow Coma Scale score and computer tomography data, 165.

Glial tumors
Predictive accuracy of cell kinetics data in glial tumors investigated by serial stereotactic biopsy, 43.

Glioblastoma
Predictive accuracy of cell kinetics data in glial tumors investigated by serial stereotactic biopsy, 43.

Glioma cysts
Stereotactic endocavitary treatment of cysts and pseudocysts of glioma. Preliminary report, 107.

Gliomas
Immunotherapy of malignant gliomas, 77.
Stereotactic interstitial radiotherapy for brain tumors, 83.

Glucose metabolism
Modulation of glycolysis in neuroepithelial tumors, 55.

Graves' ophthalmopathy
Orbital decompression for severe Graves' ophthalmopathy. Results of a three-wall operative technique, 323.
Surgical treatment of Graves' ophthalmopathy by decompressive orbitotomy, 173.

Hexokinase
Modulation of glycolysis in neuroepithelial tumors, 55.

Histological diagnosis
Cyto-histological diagnosis on wet smears of neurosurgical biopsies, 27.
Neuro-oncological problems in the histological diagnosis of stereotactic biopsies, 23.

Hormone receptors
Some differences in steroid receptors between meningeal and neuroepithelial tumors, 71.

Human glioma
Human glioma lines as experimental model for biologica and chemosensitivity studies, 39.

Human intracranial tumors
Cell kinetic studies of human intracranial tumors, 47.

Hypophysectomy
Tension pneumocephalus after transsphenoidal surgery for acromegaly, 311.

Hypovolemic shock
Injuries to the large abdominal vessels during lumbar nucleotomy, 281.

Immunotherapy
Immunotherapy of malignant gliomas, 77.

Infratemporal fossa
Trigeminal schwannoma with infratemporal extension. Case report, 293.

Interleukin-2
Immuntherapy of malignant gliomas, 77.

Intracavitary irradiation
Colloidal radioisotopes as part of a multi-modality treatment of craniopharyngiomas, 95.
Preliminary results of intracavitary treatment of craniopharyngioma with bleomycin, 145.
Stereotactic endocavitary treatment of cysts and pseudocysts of glioma. Preliminary report, 107.

Intracerebral haematoma
Spontaneous intracerebral haematomas: surgical versus conservative treatment based on Glasgow Coma Scale score and computer tomography data, 165.

Intraoperative real-time sonography
Role of the intraoperative real-time sonography in the tumours of the pineal region and third ventricle, 259.

Intraventricular trans-callosal removal
Intraventricular craniopharyngioma. Clinical and surgical considerations, 161.

Iodine-125
Stereotactic interstitial radiotherapy for brain tumors, 83.
Stereotactic radioisotope implantations in the treatment of inoperable low malignancy neoplasms, 119.

Karyotype
Occasionally-occurring familial brain tumours (OFBT). Reports of cases and review of the literature, 263.

Ki-67
Cell kinetic studies of human intracranial tumors, 47.

Lasers
Future perspectives in stereotactic neurosurgery: stereotactic microsurgical removal of deep brain tumors, 149.

Late onset
Late onset of a large cavernous aneurysm after spontaneous disappearance of cerebral arteriovenous malformation. Case report, 211.

Leiomyosarcoma
Leiomyosarcoma metastatic to the brain with prolonged survival, 291.

Linear accelerator
Linear accelerator radiosurgery. A clinical experience, 123.

Lonidamine
Modulation of glycolysis in neuroepithelial tumors, 55.

Low grade malignancy
Stereotactic radioisotope implantations in the treatment of inoperable low malignancy neoplasms, 119.

Lumbar nucleotomy
Injuries to the large abdominal vessels during lumbar nucleotomy, 281.

Magnetic resonance imaging
Cavernous angioma of the Central Nervous System, 229.
Enterogenous cyst of the spinal cord terminal cone. Clinical and radiological aspects (CT and MRI), 287.
Future perspectives in stereotactic neurosurgery: stereotactic microsurgical removal of deep brain tumors, 149.
Problems and perspectives of diagnostic imaging: the pineal region, 15.

Malignant glioma invasiveness
Stereotactic biopsies as a model for studying the interaction between gliomas and normal brain tissue in vitro, 31.

Malignant schwannomas
Therapy of malignant schwannomas: usefulness of an integrated radiologic. Surgical therapy, 253.

Medulloblastoma
"Primary" leptomeningeal dissemination of medulloblastoma. Report of an unusual case, 219.

Meningocele
Multiple post-traumatic spinal meningocele, 203.

Microcirculation
Injection-corrosion cast study of the microcirculation of the brain in haemorrhagic and ischemic disorders, 157.

Microsurgery
An experimental model to study axonal regeneration of the rat spinal cord, 329.

Middle fossa
Trigeminal schwannoma with infratemporal extension. Case report, 293.

Myelography
Narrowing of thoraco-lumbar spinal canal in achondroplasia, 185.

Neuroepithelial tumors
Modulation of glycolysis in neuroepithelial tumors, 55.

Neuroimaging
Computer assisted analysis of neuroradiological data in planning neurosurgical procedures, 19.

Neuroradiology
Problems and perspectives of diagnostic imaging: the pineal region, 15.

Neurosurgical ultrasound
Role of the intraoperative real-time sonography in the tumours of the pineal region and third ventricle, 259.

Neurosyphilis
Paretic neurosyphilis and cerebral gumma. Case report, 319.

Occipito-atloid malformations
The operation of arthrodesis for malformations of the occipito-atloid joint, according to Gilles Bernard, 197.

Oligodendroglioma
Familial frontal lobe oligodendroglioma. Case report, 317.

Optic nerve
Surgical treatment of Graves' ophthalmopathy by decompressive orbitotomy, 173.

Orbital decompression
Orbital decompression for severe Graves' ophthalmopathy. Results of a three-wall operative technique, 323.
Surgical treatment of Graves' ophthalmopathy by decompressive orbitotomy, 173.

Pain
Percutaneous selective thermorhizotomy in the treatment of "essential" trigeminal neuralgia. The importance of lesion selectivity, 179.

Peripheral nerve autografts
An experimental model to study axonal regeneration of the rat spinal cord, 329.

Pineal region tumors
Problems and perspectives of diagnostic imaging: the pineal region, 15.
Radiosurgery in intracranial tumors and vascular malformations, 91.
Role of the intraoperative real-time sonography in the tumours of the pineal region and third ventricle, 259.

Pituitary gland neoplasm
Tension pneumocephalus after transsphenoidal surgery for acromegaly, 311.

Pneumocephalus
Tension pneumocephalus after transsphenoidal surgery for acromegaly, 311.

Prostaglandins
Prostaglandins in human brain tumors, 65.

Radiation-associated neoplasia
Radiation-associated cerebral gliomas. A report of two cases and review of the literature, 271.

Radiocolloid
Colloidal radioisotopes as part of a multi-modality treatment of craniopharyngiomas, 95.
Stereotactic endocavitary treatment of cysts and pseudocysts of glioma. Preliminary report, 107.

Radiosurgery
A retrospective analysis concerning physical aspects and clinical dosimetry in radiosurgery, 127.
Linear accelerator radiosurgery. A clinical experience, 123.

Theoretical study for use of Leksell's stereotactic frame in radiosurgery, 131.

Radiotherapy
A retrospective analysis concerning physical aspects and clinical dosimetry in radiosurgery, 127.
Dosimetric aspects in stereotactic radiotherapy using small shielded sources, 141.
Panel discussion on physical and dosimetric aspects: conclusions, 143.
Possibilities and limits of brachycurietherapy in brain tumors, 115.
Radiation-associated cerebral gliomas. A report of two cases and review of the literature, 271.
Stereotactic interstitial radiotherapy for brain tumors, 83.
Stereotactic radioisotope implantations in the treatment of inoperable low malignancy neoplasms, 119.
Theoretical study for use of Leksell's stereotactic frame in radiosurgery, 131.
Therapy of malignant schwannomas: usefulness of an integrated radiologic. Surgical therapy, 253.

Schwannomas
Therapy of malignant schwannomas: usefulness of an integrated radiologic. Surgical therapy, 253.

SEM
Injection-corrosion cast study of the microcirculation of the brain in haemorrhagic and ischemic disorders, 157.

Smear preparation
Cyto-histological diagnosis on wet smears of neurosurgical biopsies, 27.

Smith-Robinson procedure
Parailiac ectopic bone complicating the removal of a bone graft for cervical disc surgery, 207.

Spinal cord injury
An experimental model to study axonal regeneration of the rat spinal cord, 329.

Spinal cord terminal cone
Enterogenous cyst of the spinal cord terminal cone. Clinical and radiological aspects (CT and MRI), 287.

Spinal surgery
Narrowing of thoraco-lumbar spinal canal in achondroplasia, 185.

Spinal trauma
Mutiple post-traumatic spinal meningocele, 203.

Spontaneous cerebro-spinal fluid rhinorrhea
A simple procedure for manegement of spontaneous cerebrospinal fluid rhinorrhea by injection of fibrin sealant. Technical note, 297.

Spontaneous intracerebral haematoma
Spontaneous intracerebral haematomas: surgical versus conservative treatment based on Glasgow Coma Scale score and computer toomography data, 165.

Stereotactic biopsy
Cyto-histological diagnosis on wet smears of neurosurgical biopsies, 27.
Indications of stereotactic biopsy, 11.
Methodology of stereotactic biopsy, 5.
Neuro-oncological problems in the histological diagnosis of stereotactic biopsies, 23.
Predictive accuracy of cell kinetics data in glial tumors investigated by serial stereotactic biopsy, 43.
Stereotactic biopsies as a model for studying the interaction between gliomas and normal brain tissue in vitro, 31.

Stereotactic neurosurgery
Long term results of stereotactic endocavitary beta irradiation of craniopharyngioma cysts, 99.

Stereotactic radiosurgery
Radiosurgery in intracranial tumors and vascular malformations, 91.

Stereotaxy
A retrospective analysis concerning physical aspects and clinical dosimetry in radiosurgery, 127.
Colloidal radioisotopes as part of a multi-modality treatment of craniopharyngiomas, 95.
Computer assisted analysis of neuroradiological data in planning neurosurgical procedures, 19.
Dosimetric aspects in stereotactic radiotherapy using small shielded sources, 141.
Future perspectives in stereotactic neurosurgery: stereotactic microsurgical removal of deep brain tumors, 149.
Stereotactic endocavitary treatment of cysts and pseudocysts of glioma. Preliminary report, 107.
Stereotactic interstitial radiotherapy for brain tumors, 83.
Stereotactic irradiation therapy. Physical and dosimetric problems, 135.
Stereotactic radioisotope implatations in the treatment of inoperable low malignancy neoplasms, 119.
Theoretical study for use of Leksell's stereotactic frame in radiosurgery, 131.

Steroid receptors
Some differences in steroid receptors between meningeal and neuroepithelial tumors, 71.

Stroke syndrome in the young
Stroke syndrome in the young due to obliterative arteritis of extracranial carotid arteries. Clinical pathological profiles, 333.

Sturge-Weber syndrome
Sturge-Weber disease without facial nevus, 215.

Subarachnoid diffusion
"Primary" leptomeningeal dissemination of medulloblastoma. Report of an unusual case, 219.

Surgical complication
Parailiac ectopic bone complicating the removal of a bone graft for cervical disc surgery, 207.

Talairach's stereotactic system
Stereotactic endocavitary treatment of cysts and pseudocysts of glioma. Preliminary report, 107.

Thermorhizotomy
Percutaneous selective thermorhizotomy in the treatment of "essential" trigeminal neuralgia. The importance of lesion selectivity, 179.

Third ventricle tumors
Intraventricular craniopharyngioma. Clinical and surgical considerations, 161.
Role of the intraoperative real-time sonography in the tumours of the pineal region and third ventricle, 259.

Thoraco-lumbar stenosis
Narrowing of thoraco-lumbar spinal canal in achondroplasia, 185.

Thrombosis
A case of thrombosed aneurysm of the vein of Galen associated with superior sagittal sinus thrombosis, 305.

Tic douloureux
Percutaneous selective thermorhizotomy in the treatment of "essential" trigeminal neuralgia. The importance of lesion selectivity, 179.

Transient ischemic attacks
Stroke syndrome in the young due to obliterative arteritis of extracranial carotid arteries. Clinical pathological profiles, 333.

Trans-sphenoidal hypophysectomy
Tension pneumocephalus after transsphenoidal surgery for acromegaly, 311.

Trauma
Multiple post-traumatic spinal meningocele, 203.

Trigeminal neuralgia
Percutaneous selective thermorhizotomy in the treatment of "essential" trigeminal neuralgia. The importance of lesion selectivity, 179.

Trigeminal schwannoma
Trigeminal schwannoma with infratemporal extension. Case report, 293.

Tumor spheroids
Stereotactic biopsies as a model for studying the interaction between gliomas and normal brain tissue in vitro, 31.

Ultrasound
Role of the intraoperative real-time sonography in the tumours of the pineal region and third ventricle, 259.

Vascular malformations
Radiosurgery in intracranial tumors and vascular malformations, 91.

Ventricular tumours
Role of the intraoperative real-time sonography in the tumours of the pineal region and third ventricle, 259.
